FAMIX 30,000 TurboDigi S6-K

Deaeration, blending and carbonation in one compact system

FAMIX has built the FAMIX 30,000 TurboDigi S 6-K for Romina Mineralbrunnen in Reutlingen. The system has been in successful operation since March 2024 and produces mineral water, organic spritzers and lemonades. Capacity of the system: max. 30,000 litres of beverage per hour.

At the heart of the FAMIX TurboDigi S is the carbonation and mixing unit. CO₂ is carried along by the jet effect of the injector and then mixed with deaerated water and the components in the mixing ball. This guarantees the finest carbonation and optimum CO₂ binding.

Your benefits:

- + **High-precision digital control of the mixing ratio**
of water, sugar syrup, base, acid, flavour and sweetener via flow meter
- + **FAMIX carbonizing and blending unit**
for the production of sophisticated beverages – whether still, with CO₂ or other gases
- + **State-of-the-art control technology**
for maximum process precision and microbiological safety
- + **Network or BUS connection**
for communication and data backup
- + **User-friendly design:**
 - smooth workflow
 - minimal losses
 - simple, automated cleaning processes thanks to hygienic design

We offer comprehensive services and know how:

Good reasons for FAMIX:

Compact and low maintenance design
Strong in special solutions
Quality made in Germany
Synergy effects through integration into the Pütz Group

Service:

Consulting
Development and construction
Assembly
On-site maintenance

Mixers, deaerators, carbonators

Batch mixers

Process analyzers

Tank washers and tank fillers

Degas- and steam installations

Everything from a single source

Take advantage of the **synergy effects** that result from our integration into the **Pütz Group**!

In addition to machines and plants for the beverage production, we are able to equip your plant with the most modern control and vision technology.
